<b>Description</b> Hello Tomas,  Thank you for the high quality of your application. Very Helpful.  Last year you answered there could be support for watches. <a href="https://dev.vecturagames.com/issues/33">https://dev.vecturagames.com/issues/33</a> Do you have any update on this subject ?  The current state of the market on the play store for wear os is ... not satisfying for outdoor activities.  I'd be glad to help for this but I have little to no skills in dev and not at all on android SDK.  Regards,

Good afternoon,  
unfortunately in the past year we have not progressed with the support for watches. Hopefully in the upcoming year we will be able to focus on its development and once the feature will be implemented we will make sure to inform you.

Thank you for using our application!  
Kind regards,  
Lucia
