#### Description

Hi,  
I have imported two tracks, I see both files characteristics but not able to display them.

<https://www.rosskopf.com/en/summer/hiking-tips.html#ipd=17874578>

How can I display the tracks in the app?

Hello, thank you for contacting us. I am sorry for this late reply we had problems with notification e-mails. We have tried to open this file in GPX Viewer PRO and it was properly opened and tracks shown. Did you still have this issue? If so, could I ask you to send also screenshots from GPX Viewer PRO? Thank you.
